## Rules for the sale of goods at artists' and traders' stands

In preparation for ShiroCo 2024, all exhibitors should read the following rules carefully. If you have any questions, please contact: [m.eschborn@c3-chemnitz.de](mailto:m.eschborn@c3-chemnitz.de)

Violations of these rules will be punished with a contractual penalty, the amount of which is at the discretion of the organiser, but at least €500. A contractual penalty can lead to exclusion from the current and subsequent events.

### Copyright

The sale of counterfeits, plagiarised and unlicensed goods is completely prohibited. Only products with a clear copyright notice may be sold. With regard to copyrighted works or products protected by other industrial property rights, exhibitors may only sell products if they are the sole author, offer original products of the author, hold corresponding rights of use or are authorised to sell for other reasons.

Upon request, the exhibitor is obliged to present the corresponding rights of use and proof!

### Bootleg checks

A bootleg team commissioned by the organiser will carry out random checks of stands. The exhibitor must ensure that only licensed goods are offered for sale! See also *Copyright* above for further information on licensed goods.

### Protection of minors

With regard to the protection of minors, products that are not suitable for minors, glorify violence and/or are pornographic are not freely accessible to underage visitors. This also applies to Yaoi, Yuri and Hentai articles.

Products of this type must be shrink-wrapped, not visible to minors and/or sufficiently censored.

Products may only be sold to visitors of legal age.

### Cosplay and decorative weapons

The display and sale of weapons, decorative weapons or imitation weapons is only permitted if these are permitted according to the ShiroCo cosplay rules. Weapons, decorative weapons or imitation weapons made of metal may generally not be exhibited or sold!

### Food

Food may only be sold in exceptional cases. This includes, for example, packaged Japanese or Asian specialities. The applicable hygiene and food regulations must strictly be observed. Ingredients must be recognisable in German.

### KI-generated products

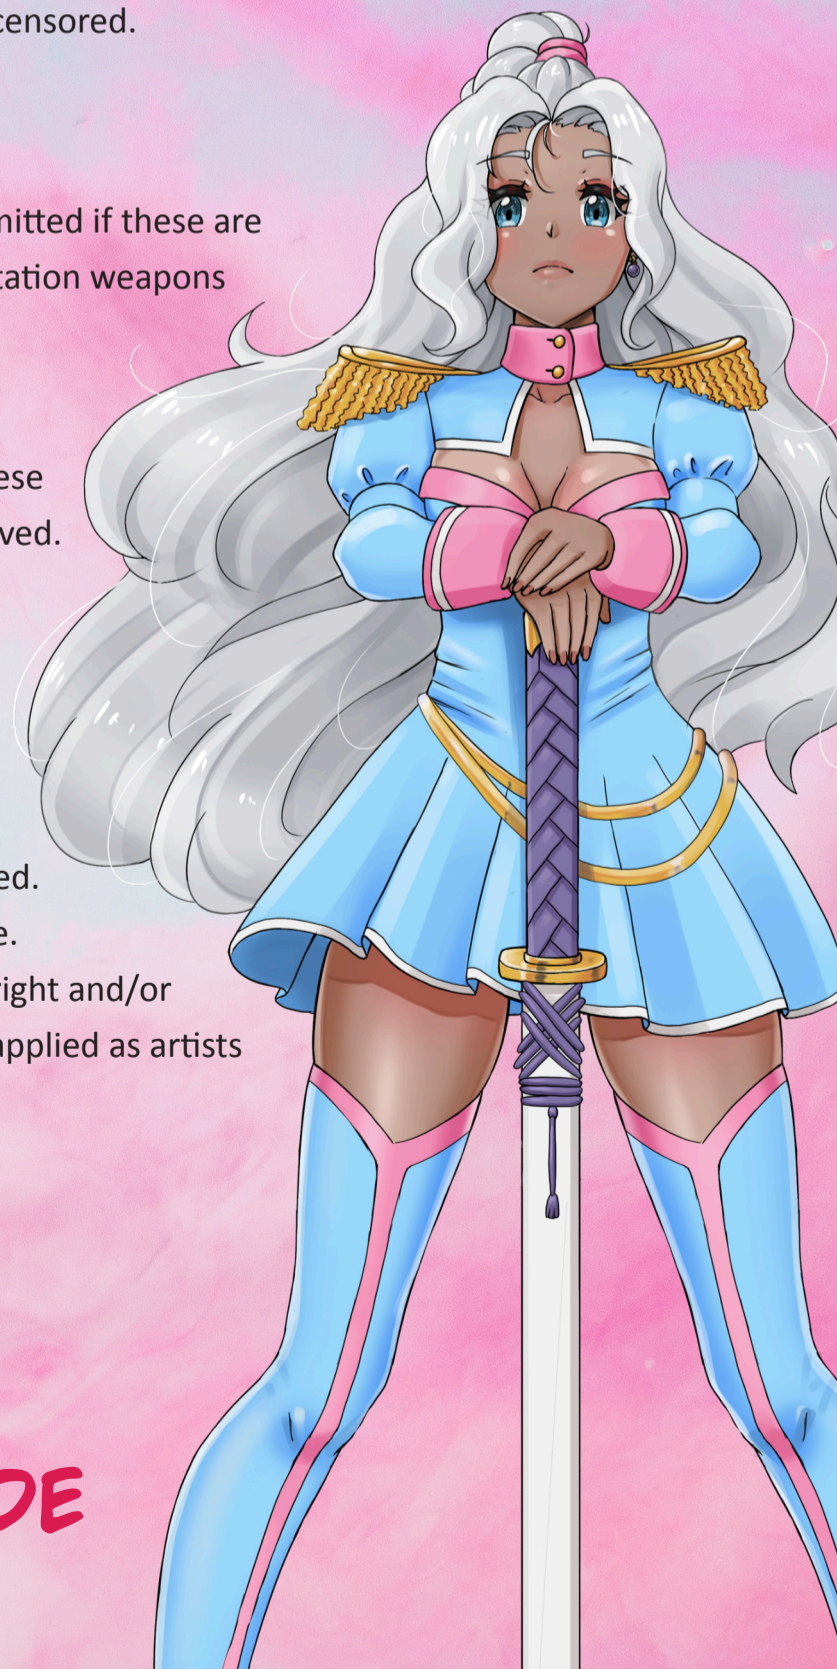

Products and items that are exclusively or predominantly KI-generated may not be sold.

### Lucky Bags

The buyer must be able to recognise from the outside what type of products are included.

The value of the products contained in the bags must be at least 90% of the selling price.

Lucky Bags or similar items may only contain products for which the exhibitor has copyright and/or patent rights or demonstrably holds the licensing rights. Exhibitors who have explicitly applied as artists may also offer self-made products and works of art in the bags.
